

FCC,

K-LOVE (FM 105.9, FM89.1 and FM100.9) provides an invaluable service in my area through the distribution of "family oriented" broadcast services, which may or may not be provided if LPFM stations are given priority over FM translator services. I know with confidence that I can turn L-LOVE on any time of the day and be assured that my family and I will not be rudely surprised. Unfortunately, I can not make this statement about the majority of FM stations currently broadcasting.

If the current local FM stations are any indication of the quality or content that LPFM's will provide I would venture to say that there would be diminution of local FM stations that provide "family oriented" broadcasting.

IF LPFM is allowed to take priority over FM translator service I would say that a the public interest is negatively impacted.

thank you for your time and efforts,

sincerely
Castillo Family
